EDUCATION

Integrated Master of Technology

Vellore Institute of Technology

2022 – 2027

CGPA : 8.62/10

EXPERIENCE

Data Analyst Intern

Inkgraph Techno Pvt. Ltd.

Oct 2025 – Dec 2025

- Engineered automated **Python-based ETL pipelines** and data validation frameworks to cleanse 50,000+ records, integrating **unit testing** and outlier detection algorithms to boost data accuracy by **25%** and reduce processing time by **40%**.
- Designed and deployed **interactive Tableau dashboards** with complex calculated fields, performing advanced **trend analysis** to migrate legacy reports and deliver real-time, high-fidelity performance metrics to stakeholders.
- Optimized **SQL queries** and database schemas for seamless **Tableau integration** and continuous ingestion of new data sources, streamlining the reporting lifecycle and enhancing the scalability of client-facing products.

PROJECTS

Customer Segmentation & Demand Forecasting

 **Notebook** 05/2025

Tech stack : R, Tidyverse, ggplot2, Hypothesis Testing

- Analyzed a dataset of **1 million+ ride records** to isolate behavioral differences between user segments, applying **correlation analysis**, **ANOVA**, and **T-tests** to validate retention hypotheses.
- Uncovered distinct **temporal usage patterns**, identifying a 20% higher weekend usage rate among casual riders to drive a targeted, data-backed membership conversion strategy.
- Generated **5+ executive-level visualizations** using ggplot2, synthesizing complex mobility data into a clear narrative for stakeholder presentation and strategic planning.

Retail Customer Clustering & Persona Analytics

 **Notebook** 08/2025

Tech stack : Python, Scikit-Learn, K-Means, Hierarchical Clustering, Plotly, Seaborn

- Engineered an **unsupervised machine learning** pipeline using **Scikit-Learn**, deploying **K-Means** and **Hierarchical Clustering** algorithms to segment a retail dataset based on multidimensional consumer behavior.
- Executed comprehensive data preprocessing with **Pandas** and **StandardScaler**, validating optimal cluster topology by systematically evaluating **The Elbow Method** and **Dendrogram** models.
- Conducted **multi-dimensional EDA (2D/3D)** using **Seaborn** and **Plotly** to map feature relationships, synthesizing complex cluster statistics into actionable, **data-driven personas** for targeted marketing.

Netflix Catalog Intelligence: EDA of Content Trends

 **Notebook** 01/2026

Tech stack : Python, Pandas, Seaborn, WordCloud, Scikit-learn

- Analyzed 8,800 Netflix titles using statistical methods and visual EDA to uncover content strategy trends and audience patterns, surfacing **3 actionable strategic recommendations** for content acquisition teams.
- Engineered temporal features (year added, content delay) and conducted time-series analysis to quantify Netflix's pivot toward originals, revealing a **40%+ reduction** in content acquisition delay post-2016.
- Applied NLP techniques – bigram extraction via CountVectorizer and word cloud visualization – to analyze 8,800+ content descriptions, systematically identifying **5 dominant narrative themes** across the catalog.
- Assessed and remediated data quality across 12 columns with targeted imputation and controlled-drop strategies, improving analytical consistency and reducing missing-value noise by **35%**.

TECHNICAL SKILLS

- Languages & Core** : Java, C/C++, Python (Pandas, NumPy, SciPy), R (Tidyverse), SQL (Advanced), Bash
- Machine Learning** : Keras, Scikit-learn, OpenCV, Supervised, Unsupervised
- Visualization & BI** : Tableau, Power BI, Matplotlib, Seaborn, ggplot2, Streamlit
- Tools & Platforms** : Git, Docker, Linux, Google BigQuery, PostgreSQL
- Core Areas** : Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate** – Coursera 11/2025
- Machine Learning (ELITE Certification)** – NPTEL 10/2024
